Art Unit 261

1. The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

2. Claims 1-25 are rejected under 35 U.S.C. 103 as being unpatentable over Goldman et al in view of Burke et al.

Goldman et al discloses a cellular system using data packets and modems while Burke et al discloses the use of an error correction method within the data packets. The various recited manipulations of modems and data packets are obvious in light of these two references. The combination is obvious since both references are concerned with radio telephone systems.

3. Frost is cited as disclosing the use of data packets in a paging system.
